7007592695, 7678986613

SKILLS

- **Programming Languages:** [Python, C, C++.]
- **Web Technologies:** [HTML, CSS, JavaScript, php, bootstrap MERN etc.]
- **Frameworks and Libraries:** [React.js, Django, Flask etc.]
- **Database Management:** [MySQL, MongoDB]
- **Tools and Platforms:** [Git, Github, AWS, Thunder client, Msoffice, Email]
- **Others:** [Computer Networking, Machine Learning, Data Analysis Data structure etc.]

EDUCATION

- **B.Tech CS | SCRIET, Meerut** ***7.01 | (2024)***
- **Diploma CS | GOVT. POLYTECHNICE** ***70.1% | (2019)***
- **XII (UPBOARD) | Govt. INTER COLLEGE FATEHGARH** ***67.7%| (2015)***
- **X (UP BOARD) | SARSWATI VIDYA MANDIR FATEHGARH** ***81.1% | (2013)***

EXPERIENCE

- **FULL STACK WEB DEVELOPMENT|ASERVEMIND INFOTECH INDIA PVT LTD (FEB.2024-APR.2025)**

  Developed both front-end and back-end applications. **Front-end: HTML, CSS**, **React.js** and **JavaScript** were used to create responsive web pages. **Back-end: Node.js, MySQL, MongoDB, REST API** was used to create and maintain databases. developed intuitive user interfaces and linked them to logic on the server side. participating in the entire web development cycle, which includes design, development, and deployment.

TRAINING/INTERNSHIP

- **WEB DESIGING – CEPTA** **Aug 2022 – Sep 2022**
- **PYTHON PROGRAMMING LANGUAGE, PROJECT – APTECH** **Jun 2019 – Jul 2019**
- **WEB DEVELOPMENT – INTERNSHALA** **Aug 2022 - Sep 2022**
- **O- level – NEILIT** **Jan 2021 - Mar 2022**

ACADEMIC PROJECTS

- **TRADING-PLATFORM**
  We are a modern trading platform built with MERN, offering secure, real-time market analysis and seamless transactions. Empowering users with responsive design, fast performance, and intuitive features.
- **REAL TIME FACE RECOGNITION ATTENDANCE SYSTEM**
  A face detection attendance system leverages machine learning algorithms to automate attendance tracking, ensuring accurate, efficient, and secure verification of individuals through real-time facial recognition technology.
- **ONLINE BIKE PURCHASING WEBSITE**
  This project analyzes online bike purchasing trends, leveraging data analytics to understand consumer behavior, preferences, and market dynamics, aiming to enhance user experience and optimize sales strategies.
- **FAKE REVIEW DETECTION**
  This project aims to detect fake reviews using machine learning techniques, enhancing the reliability of online reviews by identifying and filtering out deceptive or fraudulent feedback.
